

## GLAZING PROFILES

### What are the advantages for the users ?

- Damaged or worn-out glasses can be uninstalled easily (our profiles are reusable)
- No lines occur on the surface of the profiles after cleaning due to non-existence of silicone oil
- No color dissipation of the parts attached to the silicone profiles( requires no softener)
- Attractive and proper appearance
- Wide color options are available

### What are the technical advantages ?

- Silicone profiles are very flexible
- Profiles keep its flexibility between 60°C and 180 °C temperatures.
- Silicone profiles resist all sorts of weather condition, ageing and UV beams.
- Ventilation is homogenous due to compact fitting at joints( humidity change: 600 - 1000 µ)
- Adapts itself perfectly to parts attached
- No cracking on the material
- Resistant to cleaning detergents
- No shrinkage or shortening of the material
- Safe adherence due to cold mouldability
